Number 39

LEGION DISCUSSES HUTTERITE QUESTION

Wednesday night in the Town Hall a lively discussion took place concerning the Hutterite land purchasing problem. This meeting was sponsored by the Local Branch of the Canadian Legion and considering the very cold weather was well attended by Legionnaires and local citizens. A representation from Magrath was also in attendance. Chairman Ron Watson of the Investigation committee introduced the speakers, Mr. Rulon Dahl and Mr. Doug Paxman.

Mr. Dahl reviewed the situation which existed in 1942 when a Citizens Committee was formed to prevent Hutterites from buying land. He also gave suggestions as to what measures should be taken to renew the legislation.

Mr. Paxman spoke of the recent trip to Edmonton as a Delegate of the local A.F.U. where they passed a resolution concerning the same problem.

Mayor Wm. Jensen of Raymond and representatives of the Board of Trade, the Rotary Club and Municipal District 5 indicated that their sympathy lies with the veterans and pledged full support.

The following are resolutions passed at the meeting, which will be forwarded to government officials one of whom is Veteran Harper Prowse M.L.A.:

RESOLUTION PASSED BY THE RAYMOND BRANCH CANADIAN LEGION, 29th, January, 1947.
Be it resolved that it is the request of this organization that the act to prohibit sale of land to Hutterites be extended for the rehabilitation period of ten years, as is granted by the Veterans Land Act Regulations, and any land that is sold, or lease, should be examined by the V.L.A. and be made available for our veterans and until the requirements of the veterans have been met certainly no sales should be allowed to Hutterites who refuse to accept the duties of citizenship and support the war effort.

Also
Be it resolved that any further migration to the Dominion of Canada, and in particular to the Province of Alberta, of any colonies, or groups of persons or individuals who require or request exemption from the ordinary duties of citizenship be prohibited.

During the course of his speech Mr. Dahl made available to the meeting facts and figures of the holdings of the Hutterite colonies in this and surrounding Municipal districts:

RECORD OF HOLDINGS OF HUTTERITE COLONIES

WARNER M. D. No. 36

Colony	Acreage
New York	3680
Rock Lake	6083
Miami	8200
Elm Spring	7000
Lakeside	6694
Sunny Site	8640
New Rockport	7260
Total holding 47,617 acres out of a total in M. D. 36 of 287,707 acres on approximately 1-6 of the area.	
Population in the area approximately 1,850 out of which 850 are Hutterites.	

SUGAR CITY No. 5

Old Elm	6400
Hutterville	6080
Milford	6772.98
New Elm Spring	5751.34
Wolf Creek	6877.39
New Rockport	2384.50
Miami	5249.50
O.K.	6080
Rockport	6716
Felger Colony	6596.12
Crystal Spring	5643.27
Hutterite holdings in the Sugar City Municipal District amount to over ten percent of the total land.	

M. D. Cochrane No 6

CARDSTON	
East Cardston	4786
Big Bend	6000
West Raley	5080
Riverside	4300
Standoff	5906
Other districts in the area	
Monarch Colony (M.D. of Bright	

No. 69)	5211
Exelme Colony (MacLeod)	5209.65
Granam Colony	approx 7000
Wilson Colony	?
MacMillan Colony High River	6700
Cayley (Drumheller CC Ranch)	4480

These figures of the three Municipal districts were gathered by members of the committee from Records of districts in 1942

THE Sport Spot

Saturday January 25 the Magrath Majors and Lions invaded the Raymond ball circles. In a fast close checking game the Majors nosed out the Raymond Intermediates 44-42.

Much could be said about this teams habit of laying off a bit when the score is even slightly in their favor, but perhaps the less said the better. Some good ball playing was seen, passed out by both teams. These two clubs add materially to any program of ball playing.

The Lions and the Jacks squared off in good time in the main feature Saturday night and under the watchful eye of Bourne and Rolfeon played a fine game for Raymond conclusion.

The well known sporting feud of these two teams was well in evidence this game as witness the fouling off of Michelson and Rolfeon for Raymond and D Sabey and Rice for Magrath. Fouls were plentiful but so were good plays and in the end an apparent lack of ability on the part of some members of both teams to put the ball through the hoop the score was as high as could reasonably be expected. Magrath kept the Jacks in hot water for well over half the game, and indeed until the last few seconds of play it was anybody's ball game. These teams will meet again in Magrath on Feb. 6 we understand. This game should be well worth seeing.

Wednesday, January 19th, the Cut bank Montana team came to Raymond. In a very fast well played game before a very poorly attended house the Jacks pulled down top honors 55-49. This Cutbank team is exceptionally good and rate a much better crowd than turned out. Perhaps lack of publicity was the cause or perhaps the cold weather, or could it have been the memory of Shelby team that filled so many seats with emptiness. At any rate lets hope that they will return. They really are good!

Old time basketball scars are due to be re-opened shortly with an exhibition game between two teams of old time basketball stars in and around Raymond. The teams are called the "Sodbusters" and "White collars" and the members are just that.

All old basketball players who retired last year or twenty five years ago are asked to get in touch with either Billy Meeks (Sodbusters) or Harry Larson (Whitecollars).

All ball players now playing are urged to watch this game. You're liable to learn something.

--- 111 ---

Ladies Literary held the meeting January 22. They were entertained by Mrs. Brewerton at a theatre party with the film Saratoga Trunk. Afterwards they journeyed to the home of Mrs. Phoebe Dahl where they held their meeting and a delicious lunch was served.

Local Happenings

Reported by Elsie Mitchell

Mrs. Lottie Graham entertained Friday afternoon in honor of the birthday of her mother Mrs. Phoebe Evans who is leaving to spend the remainder of the winter in Mesa Arizona. Members of the Ladies Literary Club, old friends and members of the family were present. A pleasant afternoon was spent with a program being given and the balance of the afternoon spent in visiting. Mrs. Evans received a lovely corsage from the Ladies Literary and many lovely gifts.

Mrs. Evans left Sunday morning for the States accompanied as far as Great Falls by her son-in-law R.T. Graham.

Two cars of Ladies from Raymond attended a party at the home of Mrs. Ruby Erickson for Mrs. Welburn Johnson, formerly Winona Ursenback former Raymond resident.

Mr. and Mrs. Bob Slimmons are spending their holidays in Medicine Hat visiting Mrs. Slimmons' parents.

Dee Earl of Cardston was a Raymond visitor.

A wedding of interest to Raymond residents was solemnized January 3 at Juno, when Hans Anderson was united in marriage with Miss Helen Small. Hans is the second son of Mr. and Mrs. Anne Anderson of Raymond. The young couple will make their home in Whitehorse where the groom is employed.

Mr. and Mrs. Mose Fromm and Miss Beth Polls motored Miss Judy Buettner to her home in Glenwood with them for a visit with Mr. and Mrs. George Fromm.

Saturday evening Marolyn and Carolyn Taylor gave a slumber party to six of their girl friends.

Miss Aileen Thompson was pleasantly surprised Saturday when a number of her girl friends gave her a birthday party. The young people enjoyed a very happy evening.

Mr. and Mrs. Tom Hurlburt had as their guest for the week Mr. Hurlburt's parents Mr. and Mrs. O. J. Hurlburt of Milk River.

Mrs. Ross Humphries and small daughter of Picture Butte visited her mother here last week.

Drex Selman and Joe Hancock left last Thursday for Utah where they will visit for some time.

Mr. and Mrs. Wilburn VanOrman former Raymond residents were here for the Cardston Raymond games last Friday.

Mrs. Victor Miller and small son Marshall Bruce of High River spent last week here guests of Mrs. Irene Redd.

Glen Bullock spent the week end here with his family.

Mr. and Mrs. Frank Leavitt of Taber were Raymond visitors last week.

A party was held last week at the home of Mrs. Fred Piepgrass in honor of the birthday of Mrs. Lyle Piepgrass and for Mrs. Joyce Isaacson who left to work in Edmonton.

Monday afternoon Mrs. Gladys Gough entertained when three tables of Rook were in play. Honors went to Mrs. Ruth Salmon with consolation going to Mrs. Doris Court.

Wednesday evening the Ladies Club met at the home of Mrs. Olive Fisher. Court Whist was enjoyed with Mrs. Gladys Gough receiving honors and consolation to Mrs. Fred Piepgrass. The hostess of the evening, Mrs. Julia Tollestrup was a special guest.

Mr. and Mrs. Earl Gedamen and children of Cardston were guests here Sunday of Mr. and Mrs. Reid Litchfield.

Miss Lola Wing entertained a group of girl friends Saturday evening and a pleasant evening was enjoyed.

The staff of the Alberta Gov't Telephones enjoyed a Turkey dinner last Thursday at the home of Mary Heninger.

The First Ward Junior Girls entertained their mothers Tuesday evening at the home of their teacher Mrs. Bertha Stone. Many of the girls and their mothers came in pioneer costume and the mothers related pioneer stories. After a lovely lunch served by the girls prizes were awarded to Mrs. Manilla Meldrum and Miss Colleen Christensen for the best costumes. Mrs. Mame Roberts was a special guest.

Mr. June Anderson who was a patient with an infected hand left the hospital Wednesday.

Wayne Holland returned home from the hospital Wednesday.

Chester Seltzer who has been a hospital patient for the last month returned home Wednesday.

A shower was held Monday at the home of Mr. and Mrs. H.F. Allen in honor of Miss Theodora Redd whose marriage takes place this week. Games and a program were enjoyed the brides aunt Mrs. Lonnie Brandley of Stirling rendering two solos "O Promise Me" and "I Love You Truly" After a lovely lunch Theodora opened the many gifts of her friends.

Mr. Clark Chidwell of Calgary is here for the Stevenson Redd wedding which takes place today.

Miss Audrey Jensen was hostess last week to a party for twenty of her little girl friends when games and prizes were enjoyed.

Mrs. Vanda Grey returned last week from Edmonton where she has been visiting her daughter and son-in-law Mr. and Mrs. Rex Ehler.

Mrs. Ira Bourne, who is patient in the local hospital is improving although no visitors are allowed at present.

Mr. and Mrs. John Nilsson, a son on Thursday.

BORN—To Mr. and Mrs. Viola a son.

BORN—To Mr. and Mrs. Fred Douglas of Avalon, formerly of Raymond a son.

Mr. and Mrs. Wm Jensen entertained guests at a dinner party Friday evening. Cards and games were enjoyed with honors going to Mrs. Elia Hancock, consolation to Axel Stevenson and the travelling prize to Harry Fairbanks.

Mrs. Hazel Gibb of Cardston, Mrs. Maureen Wood of Edmonton and Mr. and Mrs. Junior Fairbanks of Calgary are here for the wedding of their sister Miss Theodora Redd to Mr. Ted Stevenson of Calgary which will take place Saturday at 5:30 at the home of her father Mr. Paul H. Redd.

Representatives to the Lions Convention at Missoula were Mr. and Mrs. H. Dean Rolfeon, Mr. and Mrs. Albert Ralph and Mr. and Mrs. P. K. Moreland. They returned home Sunday night.

Mrs. Clara Stutz of Cardston visited her daughter Mrs. Stan Cook last week.

Mrs. Stanley Czeck returned Sunday from a months visit with relatives in New York.

Mr. and Mrs. Belmore Schuultz of Milk River were visitors at the home of Mr. and Mrs. T. Hurlburt.

Mrs. Vanda Grey entertained guests Monday afternoon. Honors for rook went to Mrs. Melba Holmes and Mrs. Mabel Heninger.

Welling

NEWS NOTES

by Mrs. E. K. Bullock
The house being built in Lethbridge by Dale Earl, school principal is now nearly finished. The painting is now being done.

Much discussion has taken place regarding the rise in price of haircuts, especially those who are here on the top. They have about decided to let it grow and keep their necks warm.

Mr. Lawrence Peterson former M.L.A. has been visiting his sister Mrs. A.A. Wilde and has now left for California to spend the winter.

Mr. and Mrs. D.E. Wilde, Mr. and Mrs. E.K. Bullock, Mr. and Mrs. A.A. Wilde and Mr. Lawrence Peterson spent a very pleasant evening Friday at the home of Mr. and Mrs. A. E. Foote.

Mrs. Nephi Taylor, mother of Vaughn Taylor, who is with her husband spending the winter in Utah met with a serious accident. She was run into by a car and a vertebrae was broken. She is in a cast.

Mr. A.L. Chipman is now home from the hospital but is still unable to get around much. Mr. Thaine Smith and Kenneth Taylor are still in the hospital.

The Youth Training has resumed here on Monday, Wednesday and Friday nights. There are classes for both men and women. It is hoped more women and girls will take advantage of the course. Mr. and Mrs. Boehme are in charge.

This awful weather we are having is unappreciated and we are sure no tears will be shed on the ground of spring. We are in hopes the ground hog will not see his shadow on Sunday. Six weeks more of winter weather is not a pleasant thought to look forward to.

Mr. Lloyd Holland's mother from Cardston is visiting with him and his family.

STIRLING

NEWS NOTES

By Mrs. Lief Erickson

Donald Oler left Thursday for Pocatello where he will attend the University of Idaho for the next semester.

Evelyn Barton was rushed to the hospital after the ball game Friday night and underwent an operation for appendicitis Saturday morning.

Mrs. Lon Nelson was hostess at a family dinner held on Monday in honor of her husband's birthday. All members of the family were present. Out of town guests were Mr. and Mrs. Jerry Gibb, Mr. and Mrs. Doris Stone, Mr. and Mrs. Norman Hirsche, Mr. and Mrs. Lillian Babb of Raymond, Mr. and Mrs. Cleason Switzer, Mr. and Mrs. Tod Heabek, Lethbridge; Mr. and Mrs. Gus Roloff, Wrentham; and Mr. and Mrs. Jack Morton, McIntyre Ranch.

Mrs. Winona Johnson of Barnwell visited here a few days last week at the home of Bishop and Mrs. Erickson.

Lou Seeley is a patient in the St. Michaels hospital. He is convalescing after an appendectomy.

Mrs. Allen Erickson of Wrentham spent the week end here with her daughter Miss Ruth Erickson of the local teaching staff.

Mrs. Ruby Johnson and daughter Sylvia of Barnwell visited here during the week with her daughter Mrs. Duncan Hardy.

The local boys took the L.C.I. for a somewhat dazzling ride last Friday night to the tune of 64-27 in their basketball game. The only time the game looked anything like Leth bridges was directly after the tip-off when Greenway tipped the ball to a fellow team-mate who was wide open under the basket, but missed cleanly. From then on the game definitely belonged to Stirling. The outstanding player was Tom Fisher who pulled out of his number to score 26 points. Other Stirling point getters were Christensen 11, Erickson 16, Nelson 7 and Speck by Dale Earl, school principal is now nearly finished. The painting is now being done.

NOTICE OF Nomination Meeting 1947

PUBLIC NOTICE is hereby given that I will attend at

Town Hall Raymond

On Monday, the 3rd day of February, 1947

from ELEVEN o'clock in the forenoon until TWELVE o'clock noon, for the purpose of receiving the Nomintions of Candidates for the office of Mayor for the next ensuing two years in the case of a Town, for the office of Councillor for the next ensuing three years as the case may be, and for the office of School Board Members.

Given under my hand at Raymond this 27th day of January 1947.

G.E. Court
Returning Officer

WORLD HAPPENINGS

BRIEFLY TOLD

Work on the repairing of war-damaged Manchester Cathedral has begun.

The Cornish town of Callington, England, had no siren during the war, but has acquired one as a fire alarm.

Richard H. Turk, 70, who comes from five generations of Kingston boat builders, is the King's new barge-master.

Highest beacon guiding shipping off the Lancashire coast—a 131-foot steel mast with four lights—has been built at Rossall, Lancashire, England.

LONDON.—The number of divorces in Britain has increased from 670 petitions in 1905 to an estimated 38,000 this year the House of Lords was told.

The publishing house of the Russian Academy of Sciences is preparing a 15-volume dictionary of the Russian language with more than 200,000 words.

Henry A. Wallace announced he will visit England in April "as the representative of that part of American opinion which believes peaceful relations with Russia are feasible."

Canadian slaughtering and meat packing plants turned out \$504,850,000 worth of meat in 1945 compared with \$540,034,000 in 1944, the bureau of statistics reported.

Stansted airfield, near Bishop's Cleeve, a United States Army bomber base during the war, is to become London's first freight airport, capable of handling the biggest freighter aircraft.

Canadian Universities Planning To Spend Millions On Buildings

TORONTO.—Canadian universities plan to spend \$30,000,000 on new building in the next 10 years.

Blue prints already drawn could build \$50,000,000 worth in the same period, a coast-to-coast check revealed, but the extra \$20,000,000 is lacking.

Emphasis everywhere is on the sciences. Extensions to science faculties and whole new buildings, highlighted by Macdonald's extension, iron and radiation laboratory, reflect a countryside desire to remain abreast of latest developments in their fields.

McGill in Montreal has a \$9,114,000 program on the books, of which \$5,741,150 already is under way.

University of Toronto, whose long-range plans envisage creation of a city within the city, with 11 new buildings projected, besides alterations to existing 60 comes second with a budget of \$7,700,000.

McMaster University in Hamilton and the University of Alberta in Edmonton each plan outlays of \$5,000,000, while the Government of British Columbia has voted a similar amount for new construction at the University of B.C.

For construction of its new medical school and main building, Ottawa University will spend \$1,500,000. Proposed extensions and alterations at Queen's in Kingston, topped by the building of \$375,000 McLaughlin hall for the Faculty of Mechanical Engineering, come to \$1,295,000. University of New Brunswick's budget of \$570,000 is also topped by plans for a new science building, at \$350,000.

McGill authorities were encouraged to embark upon their program by the speed with which their \$7,000,000 endowment was raised.

Chief items are a \$1,500,000 extension to the Redpath Library, a new \$1,395,850 mining and geology building and a \$1,108,200 extension to Royal Victoria College, the university's women's residences. Included in the scheme are a \$410,000 addition to the gymnasium, intended as a war memorial, and a \$608,000 rink-auditorium adjacent to the gymnasium.

McGill is also spending \$88,000 in improvements to the library at Macdonald College, its Agricultural Faculty at Ste. Anne de Bellevue, Que.

Immortal Hymn Was Suggested By Sunset

How the hymn "Abide With Me", which is to be filmed this year in England, came to be written by its composer, the Rev. Henry Francis Lyte, is recalled by the London Daily Herald. The clergyman, Vicar of Brixham, Devonshire, died of tuberculosis in 1847. It was after preaching his last sermon at sunset that he was inspired to write the hymn destined to become immortal. The text of this sermon had been the disciples' words to Christ on the road to Emmaus, "Abide with us, for it is evening, and the day is far spent."

A grasshopper of Guinea has large glaring eye-spots that scare off enemy birds. 2709

LUZON VOLCANO BLOWS TOP—After five days of boiling, southern Luzon's towering Mayon volcano erupted with a furious shower of boulders and lava. Light earth tremors shook the area. The volcano has sent lava more than three-fourths of the way down its slopes. Camalig, with a population of 22,000, and Libon, with 7,800, were ordered abandoned. Both were in the path of the lava streams.

IODINE LACK CAUSES GOITRE

Despite the fact that lack of iodine causes simple, or endemic, goitre, and despite the fact that iodized salt is the most practical method for supplying iodine, only one-half the salt used in Ontario last year was iodized, Dr. E. W. McHenry said in a lecture in Toronto recently.

Dr. McHenry, Professor of Public Health Nutrition, School of Hygiene, University of Toronto, was speaking at one of a series of nutrition lectures arranged by the Toronto Branch of the Health League. He said that goitre is a nutritional disease which is being badly overlooked.

He added that it is known that it is not possible for most people in Canada to obtain sufficient iodine from customary supplies of food and drinking water. Therefore, limiting the sale of table salt so that only iodized salt could be purchased would be highly desirable.

Iodized salt was compulsory in all army and air force establishments in Canada during most of the war, he said, but "no one seems to care about civilians. So far as iodine and the prevention of goitre are concerned, civilians are left to their own resources."

Dr. McHenry said that nutritional conditions in Canada are sufficiently good that only one deficiency disease, goitre, occurs with any frequency among adults. Rickets and scurvy were occasionally found in babies, but diseases caused by faulty nutrition which have plagued other countries, like beri-beri and pellagra, are non-existent in Canada.

He said sufficient quantities of different foods are available in Canada to provide every Canadian with nutrients needed for health, but there is evidence that the food habits of many need to be improved and that the available foods are not being properly used.

"Ignorance and indifference," he said, are the two main causes for malnutrition in Canada. As for overweight, Dr. McHenry said he includes obesity under malnutrition.

Doctor Started Fad

Baltimore Man's Idea Of Going Hatless Soon Became Popular

Baltimore called Thomas Shearer "the happy doctor". He was always helping people—by dispensing good humor as well as by doctoring.

But Baltimore buzzed when Dr. Shearer, in 1907, decided to go hatless. His theory: Air, moving freely through the hair, would benefit the scalp.

The startled nation debated. Hatless men were a rare sight those days, even in summer. And in winter! "He'll die of galloping consumption," friends predicted darkly. But Shearer persisted. Whether from his influence, as claimed, or not, the hatless fad reached its peak in the collegiate raccoon-coat era of the '20's. All around the country men and women timidly emerged bareheaded, and liked it fine.

Dr. Shearer, hatless to the last, died last December at the age of 87. —Pathfinder.

Value Of Man's Labor

If Placed Too High Will Result In Decrease Of Work

The value of any man's labor, says Paul Hunter, in Liberty Magazine, is determined in the "last analysis" by what the ultimate consumer is willing to pay for the product of that labor. This is an unalterable truth. If a man demands more for his labor than it is worth, he soon runs out of work to do. If he is employed, his employer is forced to raise the price of the product he makes. If buyers won't pay, the employer soon has no business and the workingman no job. The higher wage scale does him no good if his job is thereby rendered non-existent. A business can keep going only if it produces its product at a saleable price.

More Canned Salmon On Canadian Market

Even if connoisseurs of canned salmon can't always get enough of it, more of that British Columbia specialty is going to Canadians now than at any time in the last six years.

Twenty-four million pounds of the delectable red-fleshed food has been flowing eastward from "the West Coast" canneries in the last few months, and, though it may seem scarce on the grocery shelves, it actually is appearing in its greatest abundance since 1939.

So when word got around that a can of salmon couldn't be found for the Canadian exhibit for the Australian Royal Easter Show, Government officials were understandably puzzled.

The fact is, they say, that the Canadian market this year is receiving what amounts to almost a normal supply of the tinned product for the first time since pre-war days.

From the 1946 pack, 500,000 cases of 48 pounds each have been allocated to the Canadian domestic trade, and already at least one-third of this amount has moved eastward. This is 200,000 cases more than the Canadian quota from the 1945 pack and compares, for instance, with such a lean year as 1942 when Britain took the whole Canadian output.

GLAMOR IS FOUND IN NEWSPAPER ADS

The New Yorker says: There is a quality in advertising, quite aside from the way it pays the bills, which seems peculiarly to complement reading matter: a certain extravagance of phrase, an unworldly, a rhinestone brilliance, an unworlship, and a promise. The ads are the reader's dream life, the reading matter is his waking hour. We suspect he loves them both. After a column of pure thought, a half page of crumbly goodness; after a hard editorial, a brand new helicopter, easy to own and operate.

Cedar birds will line up on a limb and pass a piece of fruit, or a worm, back and forth.

NEHRU'S SISTER ON TOUR—Social and political leader in India, Krishna Nehru, shown here, sister of Jawaharlal Nehru and author of the book on the Nehru family, "With No Regrets", arrived in New York by plane from India. She is in the U.S. for a nation-wide lecture tour.

JUST LIKE INDIVIDUAL

Our national stock-taking compares favorably with that of the individual who has borrowed heavily to go on a spending spree. Now we must return to work and careful management to avoid losing all; if we do not, we may one day find ourselves broke and in need of foreign loans to begin again.

How One Parent Made Son Popular

The Empire Digest tells the following story as recounted by a fond parent: "Michael's first day of school arrived. I walked with him to the assembly point where he was to catch a bus. The bus was waiting, fringed by a tight cluster of little boys eyeing each newcomer with suspicion. Michael's grasp tightened. I felt his apprehension. 'Michael,' I said in a loud voice, 'I want you to come straight home after school. Remember, you've got to help me skin that elephant.' I pushed my son toward the bus, turned and walked rapidly away. Silence. Then a babble of little boys' voices. I glanced back. One boy was holding Michael's books, another his lunch box, a third was helping him on the bus. A great peace descended upon me. I had measured up to the responsibilities of fatherhood."

One Person Solved Housing Problem

The Leader Magazine reports that at a London railroad station a clerk had a strange request: "Can you tell me," said an enquirer, "of any train leaving the station round about 10 p.m. which connects up somewhere with another one getting back here by 10 a.m.?" The clerk had convinced himself that his customer was drunk when the explanation came: "I have nowhere to live and if you tell me of a few night trains I thought I'd reserve sleepers to get a few nights' rest."

RAYMOND SUPPORTS NATIONAL CAMPAIGN ST JOHN AMBULANCE APPEAL FEB 2-22

Being sponsored jointly by the Raymond Branch of the Canadian Legion and the Local First Aiders Group, two meetings of the various representatives of the community were held in the Town Hall on January 23 and 27 to discuss the desirability of participation in the National Campaign of the St. John Ambulance.

After listening to the local representatives of the St. John Ambulance who presented the information on history and activities of the Association, and also on the activities of the local First Aiders Group, lively discussion ensued. Appreciating the highly humanitarian work that the order of St. John has been doing throughout the Dominion and British Empire in general, both meetings

went on record as favoring unadvised participation in the campaign with the following committees being set up:

1. Dr. J. Harris Walker, Hon. Chairman.
2. John Landysheff, Campaign Chairman
3. Miss Vonda Smith Secretary
4. Melvin Depew Representative of the Canadian Legion.
5. Wilford VanOrman, Representative of the First Aid Group.
6. Neils Peterson, Representative of the Rotarians.

7. Sidney Ralph, Representative of the Lions.
8. Mrs. R. Minion, Representative of Ladies Aid.

9. Mrs. J. Laidson, Representative of the Womens Institute.
10. Mrs. I. Kitchen, Representative of the Womens Institute.
11. Mr. Frank Taylor, Representative of Industry.
12. S.J. Weaver Representing the local Press.

Donations will be solicited by canvassing the town sometime between February 2nd and 22nd. For this purpose the town is divided into four zones with the dividing line running from north to south being Broadway while from east to west the street where the Opera House and Telephone office are located. The following parties are in charge of the various zones.

1. Mr. Neils Peterson—South west of the dividing lines, assisted by the Relief Society of the First Ward.
2. Mr. Melvin Depew—South east of the dividing lines assisted by the Ladies Aid.
3. Mr. Wilford Van Orman—North east of the dividing lines assisted by Relief Society of Second Ward.
4. Mr. Sidney Ralph—North west of dividing lines assisted by Womens Institute.

Grass and Roots

Do it NOW!

He who gives quickly gives twice. Send your cheque or money order TODAY to order CANADIAN AID TO CHINA for IMMEDIATE relief of suffering among Chinese victims of war and famine.

This is the only national appeal to be made in Canada within the next twelve months for Chinese relief.

...the only food for him,
and millions like him,
in war-ravaged China

This old peasant, his farm devastated by the Japanese, is too weak to work. His diet for months has been grass and roots. Of China's people, 83 per cent. are farmers. Millions are in urgent need of food, clothes, medical supplies. UNRRA's work is ending; voluntary agencies must carry on. Canada must do her share. Will YOU help? China, a good neighbor and customer, will not forget.

Be Generous! China, a Good Neighbor, calls to you!
CANADIAN AID TO CHINA

The Food Situation

IN CANADA WARTIME RESTRICTIONS are gradually being lifted and for some time now we have enjoyed a growing freedom from the necessarily difficult conditions brought on by the war. We are sharply reminded at times, however, that for people in many other parts of the world the situation has not improved as speedily as it has for us here. People are continuing to die of starvation in China and India and in some parts of Europe rations are still very limited. At the end of the war food was one of the most vital matters facing the world. It was expected that by the end of 1946 the situation would have ceased to be a major problem, but it now appears that it may continue to cause considerable concern in the coming months.

Two Factors Are Involved

Two factors appear to be involved in the serious conditions which are found in many places. One is that because of drought conditions European crops did not yield the amount of food which was anticipated earlier in the year. Another is a slowing up of the delivery of food from those countries which have supplies to export. In the case of Canada alone, it is reported that exports between August and November, 1945, amounted to 153 million bushels of wheat and flour, while for the same period in 1946, the amount sent out from this country was less than half of the previous year's figure.

Food Scarcity May Continue

A report presented to the General Assembly of the United Nations on the probable situation in regard to food during 1947 shows that supplies of bread grains, rice, fats and oils, dairy products, meat and sugar available are likely to be "substantially inadequate to meet minimum requirements for human consumption." The prospects are that many of the products will be available here and in the United States although at higher prices than we paid in the past. In other parts of the world, however, they may be expected to be in very short supply, in many cases perhaps not available at all. The Assembly has unanimously passed a resolution asking member governments "to continue and strengthen international efforts and machinery with a view to utilizing exportable food supplies with due consideration for the urgency of the food requirements in the needy countries." It is to be sincerely hoped that equitable and humane solution may be found to this very vital problem.

HONORED FOR "LOYAL AND DEVOTED SERVICE"

LONDON.—Cleaning woman Mrs. Amy Lavina Stokes, employed for the last 26 years at Harefield County Hospital, was awarded the British Empire Medal "for loyal and devoted service" in a recent honors list.

When Mrs. Stokes' husband died in 1926, she was left with seven children. She got jobs for four of them at the hospital and continued working herself.

"Nobody here has ever heard Mrs. Stokes grumble or complain," a hospital official said.

SALADS FOR SYDNEY

Salads in cellophane are the latest innovation for Sydney, Australia, housewives. The Vegetable Growers' Association of New South Wales has made plans to transport all types of vegetables, snap-frozen, wrapped in cellophane, packed in cartons, direct to country centres by refrigerated road or rail trucks.

Thickness of the human skull ranges from less than one-eighth inch to almost one-half inch.

Answer To Last Week's Puzzle

The Royal Bank Of Canada Annual Meeting

Sydney G. Dobson, President, declares increased industrial output, co-operation between management and labour and substantial tax reductions would provide bedrock of future prosperity—"If business, labour and government keep their heads, there is no reason why we should not complete our delayed reconversion plans this year and prepare to step forward in future."

James Muir, General Manager, reports assets at record level for sixth consecutive year—notes increased financial assistance rendered business and individuals—deposits at \$1,963,103,951 reach new high point—foreign branches valuable aid to traders.

Warning that lavish government expenditures provide no assurance of good times, and that living standards cannot be raised through less production and higher wages, was voiced by Sydney G. Dobson, President of The Royal Bank of Canada at the bank's Annual Meeting.

On the other hand he declared that increased production and whole-hearted co-operation between management and labour would provide a solid basis for prosperity. He also noted that the present level of taxation was a drag on business and that substantial tax reductions would give an incentive to greater production and lower prices, and therefore, prove an aid to a higher standard of living.

CANADA PLAYS FULL PART

Stressing the increasingly important role of Canada in world affairs, Mr. Dobson said: "Canada is playing her full part in the peace organizations and served on nine international bodies. She was the second largest contributor of food and the third largest contributor of money to UNRRA. She has the largest store in the world of the basic essential of atomic energy—uranium. I believe that though in numbers the Canadian people carry small weight in the world, when the account of world well-being comes to be added up it will be found that the weight of Canada's influence was a big factor in whatever success is attained."

"I think that experiences of the past few years have brought home to all of us the fact that business and industry exist to satisfy the needs of people."

"There are many wants, such as political and economic security, facilities for improvement and relaxation, competent health services, and wider education, but I shall speak particularly of the business aspects. I believe that prosperous business conditions will be the bedrock upon which people will satisfy most of their other wants."

SUCCESS NOT MADE OF DREAMS

"There have been all sorts of plans laid out by advocates of improvement in our economic affairs, but it is becoming clear that many of the old principles of sound economics will survive, and some that had been abandoned must be returned to. On the whole our Canadian people are Utopia, but they know that success is not made of dreams. The story of Canada's advancement is one of people and resources, and the ingenuity of the people in using the resources."

"Roughly 68 per cent. of our population are under 40 years of age. That means that the numerical bulk of the people is not yet 'set' in its ways, but is of an age to demand the latest, or better than the latest, in devices, comforts and services of all kinds. It is a thought to keep every business executive on the alert, because people's wants rule the market and decide the profit or otherwise of production."

"Given an intelligent approach by business executives who are trying in a sincere way to develop a better knowledge of what the consumers want, there is no reason why Canada cannot look forward to a period of great expansion, profitable business, and higher standards of living."

"I regret very much the irresponsible outlook many persons have regarding work and wages. I am one who believes that the time will come again when possession of a job will be considered an asset, when having a little money as a standby will loom larger in people's minds than leisure hours. True satisfaction can be found only when the worker values mainly the work he does, and not how much he is able to compel his employer to pay. I believe in a high standard of living for everyone, and in leisure, but I am sorry to say that too many of our people to-day make high wages and plentiful leisure the greatest aims of their lives. They pay too little attention to the fact that every producer is also a consumer, so that what they gain as producers they lose as consumers. It is wholly false to say that less production and more pay per worker can assure us of prosperity; just as false as to think that raw material and labour costs can be increased without at least a corresponding increase in the cost of living."

BEST WEALTH

Reviewing Canada's fortunate competitive position, Mr. Dobson pointed particularly to Canada's 813,000 square miles of productive forest, wealth and urged that steps be taken to assure its conservation. "Canadians are generally surprised," he said, "when they learn that their pulp and paper mills take only about 23 per cent. of the annual forest crop, while fuel wood takes 31 per cent., lumber and miscellaneous products take 41 per cent., and pulpwood exports use over 5 per cent."

"Though pulp and paper creates more employment than any other manufacturer and is the largest single item in Canada's export trade, yet fire, insects and disease consume 60 per cent. more wood annually than do the pulp and paper mills. Other countries have succeeded in practically eliminating wastage due to nature. In Sweden, with less than 8 per cent. of Canada's forest area, there are more than twice as many forest engineers as in Canada."

VALUE MULTIPLIED

"I wish to draw one fact particularly to your attention. In 1945 the pulp and paper industry took pulpwood valued at \$122 million, and converted it into products which had a gross value of \$400 million. In other words, the industry multiplied more than threefold the value to Canada of its pulpwood cut. In course of that process, its mills gave employment to 40,000 persons and paid them \$80½ million in salaries and wages. In addition, it supplied workers in the woods with employment and their wages amounted to \$75 million. When you add the purchase of materials and supplies, \$184 million, you realize how important the industry is to the whole economic life of the nation."

"That this industry could be further expanded is evident when we consider that the pulpwood shipped out of Canada in a raw state in a year would supply a large paper-making industry."

"The lumber industry which includes production of sawn lumber, shingles and boards, has been increasing steadily. As in the case of the pulp and paper industry the value of the forest cut has been much increased by processing, in this case almost doubled."

NEW PRODUCTS FROM WOOD

"In addition, new horizons are opening up for the use of our forest products, such as in the manufacture of plastics and textiles. This field so far has only just been tapped, and holds tremendous possibilities. We cannot, therefore, afford to waste or to see carelessly destroyed any portion of our great forest resources."

"Throughout the responsible financial press during late months, we have seen articles to the effect that today more than ever increased industrial output is a necessity. We need the best co-operation possible between management and labor. The high rate of productivity which would result would be the only effective influence I know of against inflation."

Dealing with the question of taxation, Mr. Dobson noted that war expenditure was down to 35 per cent. of what it was in the peak year. "Yet the government is collecting in this taxation year an amount equal to 24 per cent. of the approximate 1946 national income compared with 1.05 per cent. in 1938. The Finance Minister set his requirements at \$2,769,000,000 in his last budget, compared with \$254,400,000 in 1938."

DRAG ON BUSINESS

"Now it doesn't matter where that revenue is accumulated by the government, or how it is taken, the withdrawal of this money constitutes a drag upon business. Substantial reduction in taxes would give an incentive to individuals and to industry, encourage expansion and new ventures, encourage greater production and lower prices, and therefore prove an aid toward a higher standard of living."

"Some will say the government needs the money for social welfare and subsidies and so on, but I would point out that lavish government expenditure has been unsuccessful in creating prosperity. 'A let the government do it' attitude will not get us anywhere, and necessity alone should be the decisive factor in judging whether to retain some of the wartime controls and practices. In some cases the manufacturers' profit has been squeezed between rising costs and the price ceilings. I approve the policy of removing controls gradually, but as quickly as goods and services become available, and I am hopeful that world and domestic conditions will soon permit us to return to a free economy."

"This country reached maturity through its war effort, politically and industrially. If business, labour and government keep their heads there is no reason why we should not complete our delayed reconversion plans this year, and prepare to step forward in future."

GENERAL MANAGER'S ADDRESS

In presenting the bank's 77th Annual Report, Mr. Muir, General Manager, stated that for the sixth consecutive year the total assets of the bank, which now stood at \$2,131,974,316, had reached new record levels. New records had been established in many departments of the bank's business. Liquid assets totalled \$1,609,742,166 representing 81.69 per cent. of the total liabilities to the public.

"The volume of commercial loans in Canada is up by \$25,789,321," said Mr. Muir, "but this does not give a true picture for the reason that at November 30, 1945, a Victory Loan campaign was in full swing; nor is the loan total a complete index of the financial assistance which is being supplied by the bank to our clients in their post-war business activities, included under the heading 'Other Bonds, Debentures and Stocks' are many millions of dollars representing the purchase by the bank of short-to mid-term bonds and debentures issued by clients to enable them to carry out expansions and improvements of a capital nature."

"In addition, the smaller class of customer continues to take substantial advantage of our facilities. This is demonstrated, for example, by the fact that during the past year we have made a total of nearly 150,000 loans of \$500 and under for personal purposes."

"Our loaning business abroad has also continued to expand as is illustrated by a well diversified increase of \$16,623,715 in commercial loans."

RECORD DEPOSITS

The General Manager noted that total deposits had increased by more than \$74,000,000 to the new all time high point of \$1,963,103,951. The number of deposit accounts in operation continues to grow and as a matter of fact has increased in Canada alone by 116,000 during the year bringing the total in operation up to 1,670,000.

"The profits for the year were \$903,244 greater than for the preceding twelve months' operations."

"As you will have observed from the Directors' Report, it has been decided to transfer to the Reserve Fund the bank's \$5,000,000 from the amount net credit of Profit & Loss Account."

"There will still be left the substantial sum of \$1,467,414 to be carried forward."

"You will also note that the Reserve Fund has been further increased by the addition to it of the sum of \$15,000,000, bringing the Reserve Fund of the bank up to \$40,000,000."

"It may be recalled that in the depression period of the middle 30's it was decided to transfer \$15,000,000 from the Reserve Fund to inner reserves. Time, however, has shown this to have been an overly conservative precaution. Consequently the entry has simply been reversed."

AID TO FOREIGN TRADERS

Discussing the wide network of branches operated by the bank, Mr. Muir referred particularly to the useful role played by the bank's foreign branches in facilitating foreign trade. "The unique position which we occupy," he said, "as the Canadian bank with the most extensive chain of foreign branches, enables us to render exporting and importing clients a banking service which cannot be paralleled."

Mr. Muir spoke in highest praise of the loyalty, ability and interest of all members of the staff. "Your bank is not the handiwork of any one man," he said, "nor even of any small group of men. On the contrary, it is a monument to the co-operative effort of many, each one serving with enterprise and enthusiasm in his or her particular sphere of duty."

FOUR-YEAR-OLD BOY MUST USE FALSE TEETH

EVANSTON, Ill.—A four-year-old boy who dentists say never will have teeth of his own is wearing a complete set of false teeth. The youngster, whose name was not made public by the Northwestern University Medical School, which made the dentures, is a victim of total anodontia, in which even the beginnings of teeth are absent.

OUR COMPLETE
SHORT STORY—

THE FEMALE OF THE SPECIES

By MARY L. AKSIM

Copyright Wheeler Newspaper Syndicate

TAD was the last to give up. Long after Butch and Lanky had eased themselves into the most comfortable positions possible for six-foot sergeants on a double train seat and had begun to doze, Tad kept beaming across the aisle at the beautiful corporal, clearing his throat with provocative meaning, raising his eyebrows in a manner called irresistible by women of two continents.

After a few minutes he sorted his long legs out from those of his sleeping companions and strolled with admirable nonchalance to the water tap. He could feel the pretty corporal watching him as he swung easily between the rows of seats. Well, it was a good back, he smiled to himself. What was it that little French girl had said?

He looked sideways at the girl as he came opposite again, but she was looking out of the window oblivious to all his manoeuvres; and Butch and Lanky had each appropriated a full half of the double seat and were sleeping innocently. For a moment Tad considered offering to lift the corporal's suitcase from the seat beside her to the baggage rail overhead, but when she still gave no sign that she knew of his existence, he sighed loudly and moved in with a withered old lady in the seat ahead. He looked back once more, with no result; so he sank down as far as he could, jammed his knees into the plush, and presently, he, too, slept.

The train stopped with a terrific jolt and shudder. Tad sat up and glanced back at Butch and Lanky, but they didn't even move. It was then that he noticed that the corporal was tugging at her suitcase and giving every evidence of getting off at this station. Sergeant Barclay saw his opportunity and acted with that decision and despatch which had been the delight of his superiors on the battlefield. In one movement he had grasped the handle of the suitcase and was leading the way down the aisle. The corporal followed meekly as he descended the steps to the platform. And then the sergeant made one of his famous on-the-spot-of-the-moment decisions.

"I think," said Tad, doing his best to make it sound impersonal, "I think I'll just wait for the next train."

If the corporal was surprised she didn't show it. She smiled and led the way along the platform.

For a moment Tad couldn't believe his eyes when he saw those twin pin-ups waiting in the jeep. They were almost identical, with long-lashed blue eyes and hair of shining gilt. He sighed a long sigh of utter contentment and climbed into the jeep after the corporal. Great, wide, wonderful world of women!

The jeep turned through the gates of a huge enclosed area. A whistle blew shrilly, and, in an instant, long columns of red, green, blue, yellow and gold uniforms were converging upon a gold figure standing solitary

and splendid on the parade square in the bright sunlight. Tad's heart was whirling madly now. Where had all these wonderful, wonderful women come from? Probably not another man in the whole camp. One-two, one-two, left-right, left-right, beat the drum, and the platoons started down the field, their coloured uniforms dazzling in the sunlight. Six abreast down the centre, then three-by-three around the square. Tad felt himself growing weaker as the columns of perfumed puletritude came closer, ever closer. Left-right, left-right beat the dainty feet as they pivoted to position and then someone shouted "Halt!" and the feet and the drums were still.

The corporal turned to Tad as a figure mounted a reviewing-stand. "Come," she said, and Tad followed without a word.

"You see before you," the Commanding Officer said to Tad, "a new type of army. An army composed entirely of women. In the future we hope that the defence of our country will be entrusted wholly to us. And you, sir, will be able to help us in this great undertaking. We are in need of the services of one man to help us bring to conclusion a series of experiments we have been conducting. We need YOU!" and she smiled at Tad a smile that came on like an electric light, and dimmed just as quickly.

"But-but-but..." Tad began. The C.O. led the way into a building marked EXPERIMENTS. "In this department," she said, "we are on the verge of the greatest discovery in the history of man!" She looked at Tad to be sure that he was taking in the full import of her words. "We have discovered a means of transferring the hearing of the young to the male!" she exclaimed. "Now all we need is a..." but Tad didn't wait to hear the rest of the sentence. He was running as he had never run before, out of the EXPERIMENTS building, past the parade square, along the road, on to the gates.

There was a great roar of pursuit behind him. Women called his name in tones now pleading, now shrill. There was the sound of many feet—and then the air above him was filled with tiny one-seater planes, each piloted by a blonde pilot who bombarded him with small sachets or silver arrows, but he stumbled on frenziedly and when he reached the station all his pursuers had dropped away. To his unspeakable relief a train was panting to be off and Tad struggled aboard and fell down into the first vacant seat.

He was brought sharply to by a poke from an umbrella. He sat up, weary, incomprehending.

"My goodness!" snapped the old lady beside him. "Stop thrashing about so! And I'm sick to death of hearing you mumble in your sleep!" Sheepishly Tad looked back at Butch and Lanky. Still asleep. Then he stole a glance at the beautiful corporal. She was actually preparing to get off the train and from the safe refuge of imminent departure she flashed Tad a smile and looked with meaning at her suitcase. But Tad covered his face with a magazine and pretended not to see her.

Sets Milk Record

Ontario Farmer Reports Outstanding Production Of Purebred Guernsey

Glenady Shirley, a purebred Guernsey cow owned by R. R. Sutton, of Agincourt, near Toronto, has just completed an outstanding record of production.

Milked twice a day for 305 days under ordinary farm conditions, she produced 13,472 pounds of milk and 657 pounds of butterfat, testing 4.89 per cent.

This is the highest official Canadian 305-day record ever made in twice a day milking in any age class by a Guernsey cow.

GOING TO TIBET

Four monks of the Saint Bernard Hospice, Switzerland, left London airport recently on a journey which will eventually end at Lhasa, Tibet, where they will do relief work among the natives. The party is led by Belgian Father Jules Detry.

Rubbish around a home, whether in basement or attic, is one of the chief causes of home fires.

AUSTRALIAN WOMEN GROW RICE CROP

LEETON, Australia.—Two sisters who have managed a mixed 525-acre farm in this New South Wales district for 25 years have proved that women can succeed at rice farming in Australia.

They are Margaret and Lois Grant whose father, Donald Grant, celebrated his 101st birthday last year.

The Grant property grows rice, oats, fruit and vegetables, and in 1929 won the first prize ever given for an Australian rice crop. It was one of the first of six farms in the district to grow rice well, and Mr. Grant and Miss Margaret Grant sold the crop in Melbourne for £15 (\$48) a ton.

The Grant home is a comfortable English, style bungalow which the sisters designed themselves. Around the lounge-room walls are rare Chinese prints which have been in the family for several hundred years. Doulton china, early pewter mugs and other family treasures from England are along the mantelpiece.

Mr. Grant came to Australia in 1865 after receiving a grant from the Duke of Sutherland for military service. He worked for nine years on a station of 300,000 sheep in the Riverina district of southern New South Wales, and became station manager. His two daughters were born there, and the family went to the Leeton district in 1912.

At that time rice had not been established in the Leeton irrigation area, so Margaret and Lois decided to run the farm as partners and plant 16 acres of rice in addition to their other crops.

Lois Grant, the younger sister, manages the finance and accounts of the farm. Margaret supervises the farm work.

SELECTED

RECIPES

JOHNNYCAKE
1 cup sifted flour
2 teaspoons powder
1 teaspoon salt
1/4 to 1/2 cup sugar
1 cup yellow corn meal
2 eggs, well beaten
3/4 cup milk
4 tablespoons melted shortening

Sift flour once, measure, add baking powder, salt, and sugar, and sift together into bowl. Add corn meal and mix well.

Combine eggs and milk and add to flour mixture. Add shortening, then mix only enough to dampen flour.

Turn into greased pan, 9x9x2 inches, and bake in hot oven (400 deg. F.) 1/2 hour.

MINCE TURNOVERS
Roll Pie Crust 1/4 inch thick and cut in 6-inch circles. Place 1/4 cup mince meat on one half of each; moisten edge with cold water and fold pastry half over filling, pressing edges together with fork. Prick tops and brush with milk.

Bake in hot oven (400 deg. F.) 30 minutes, or until browned. Makes 8 large turnovers.

Try topping each with thin slice of American cheese and return to oven for 5 minutes.

For tea-size turnovers, cut 3 1/2-inch pastry circles and use 1/2 tablespoon mince meat for each. Bake 25 minutes.

MODERN SPEED

The Christian Science Monitor says Jules Verne is obsolete for good and sure. Around the World in 80 days, indeed! And 20,000 Leagues Under the Sea! The V-2 rocket fired over the New Mexico desert can make its way around the world in 8 hours. And 114 miles up in the air!

A HOME'S A MYSTERY TO WEE PARK TENANT—Along with more than 1,000 veterans and their families who spent the night in MacArthur Park, Los Angeles, in protest against the housing situation, was Karen Lucas, four. Her father just returned from the Pacific, and she asks, "What's a home?" as she strolls between tents and bedrolls.

Revival Of Christianity Spreading In Japan

TOKYO.—A revival of Christianity is spreading like "a flame of fire" through Japan, Dr. Toyohiko Kagawa, Nipponese evangelist, claimed.

"Since June of last year we have had 20,000 converts to the Christian faith," Kagawa said. "It's a spiritual revolution among the Japanese, particularly those in the country districts."

Kagawa's recent status as an "undesirable because of activities during the war" still is under investigation.

He declared that at least 1,000 foreign missionaries were needed in Japan to aid the 2,000 Japanese ministers and 400,000 Japanese Christians. Of these 250,000 are Protestants and 150,000 Catholics, he said.

Japan is fortunate in having "prayerful MacArthur as supreme commander for the Allied powers, who is an honest Christian whose prayer is finding a way into the hearts of the Japanese people," Kagawa declared.

FUNNY and + + + + OTHERWISE

The mother and daughter were busy with the plans for the wedding when the bridegroom-to-be called. He watched the preparations rather impatiently a while, until his future wife noticed his look of annoyance.

"Darling, we have such a lot to do," she soothed, "and if we want to make our wedding a big success we mustn't forget the most insignificant detail!"

"Oh, don't worry about that," murmured the young man. "I'll be there all right."

Friend—What is your favorite sport?

Doctor—Sleighb.

Friend—No, I mean apart from business.

The new Land Girl was doing her best, but she was evidently finding everything on the farm very strange.

Having an incubator explained to her, and been asked if she fully understood it, she put her head on one side and, with a puzzled look, replied:

"Yes, but where does the hen sit?"

"Tommy," asked his stingy uncle, "how would you feel if I were to give you a penny?"

"I think," replied Tommy, "that I would feel a little faint at first, but I'd try and get over it."

"Are you an expert accountant?" asked the prospective employer.

"Yes, sir," said the applicant.

"Your written references seem all right, but tell me more about yourself."

"Well, my wife kept a household account for 30 days. One night after dinner I sat down and in less than an hour found out how much we owed our grocer."

"Hang up your hat and coat," directed the employer. "The job's yours."

A suburbanite had started keeping chickens because he likes more than one egg a week. The other day his neighbor said: "Oh! Your chickens are coming into my garden."

"I thought something like that must be happening."

"What makes you think so?"

"One goes away every now and again—and never comes back."

Judge—Did you see the shot that was fired?

Witness—No, I only heard it.

Judge—That is not sufficient evidence. You may retire.

As the witness left the stand and while his back was turned to the judge he laughed out loud. At once the judge recalled him for contempt of court.

Witness—Did you see me laugh?

Judge—No, but I heard you.

Witness—Insufficient evidence, your Honor.

When man is born, people ask: "How is this mother?"

When he marries, they say: "What a beautiful bride!"

When he dies, they ask: How much did he leave her?"

The magistrate peered through his spectacles at the scared little man before him.

"You allege that your wife assaulted you?" he said. "Tell us exactly what she did."

"Well, sir, she hit me with an oak leaf."

"But surely that didn't hurt you."

"You bet it did. It was an oak leaf from the dining-room table!"

To Feel Right — Eat Right!

Housing Construction To Be Great During The Next Five Years

NIAGARA FALLS, Ont.—Prediction that during the next five years "there will be a high level of employment with national income of the same general order as say 1941 and 1942" was made by Labor Minister Mitchell in an address to the Canadian Construction Association in convention.

Mr. Mitchell, referring especially to housing, said "under such circumstances there seems to be every reason to believe that 400,000 to 500,000 units of housing can be readily absorbed in the five years ending 1951. I do not under-estimate the seriousness of the present housing shortage. Vigorous steps must be taken to meet our needs."

It was unfortunate that at present residential construction is in competition with industrial and commercial expansion, he said, and "it seems to me that in a long-term view we should make every effort to establish as a permanent feature of our economy a high annual production of residential construction."

With increases in supplies he foresaw increases in residence construction in 1947 however at the same time maintaining industrial and commercial construction.

FARMER WANTS REAL MONEY

A farmer friend who has saved a modest sum of money in forty-five years of farming sends us the following:

The United Farmers of Canada, at their recent convention in Regina passed a resolution calling on the Dominion Government to pass legislation authorizing the Bank of Canada to create interest-free credit (money) for the use of municipalities and governments. The financial editor of a Toronto newspaper in explaining the resolution says that for every hundred dollars the bank have on deposit or in reserves they can lend a thousand dollars; and that this additional credit will cost nothing but the expense of making the book-keeping entry.

If this theory is correct, why be so niggardly in applying it? Why confine the benefits to municipalities and governments? Reports to the Department of finance show that

the deposits and reserves in the chartered banks at the present time total over six billion dollars.

According to the newspaper editor way of thinking this should put the banks in a position to lend a total of sixty billion dollars,—enough to take care of all the financial requirements of all the governments, all the corporations, and all the private individuals in Canada. Why don't the banks do it and make everybody happy? We suggest that they don't do it because long experience has taught them what happens to banks and bankers who depart from sound principles in handling other peoples' money. They may also have read what the good book says about the house that was built on a foundation of shifting sand.

Farmers who have to give hard work and actual created wealth for every dollar they get, will resent any attempt to pay them off with money that has nothing behind it but figures in a ledger.

West Farmers Hit Records In Wheat Crops

OTTAWA.—Canadian wheat farmers, blessed for the most part with good weather, hit the jackpot in 1946 by producing 420,700,000 bushels, eighth highest crop on record.

And, the Dominion bureau of statistics reported in its third estimate of field crops in Canada, the bumper harvest was valued at \$480,215,000, believed to be the second highest in history.

Not since the big money, free-and-easy days of 1925 have Canadian farmers reaped such a windfall. In that year 395,475,000 bushels were produced and the crop, selling at an average of \$1.23 a bushel, was valued at \$487,736,000.

This year's crop compared with the long-term average of 310,021,000 bushels valued at \$269,200,000 and with the 1945 output of 318,512,000 bushels valued at \$367,467,000.

Only one year since the war started in 1939 has the current production been bettered. That was in 1942 when farmers went all out to speed wheat to Britain, producing 556,134,000 bushels valued at \$385,133,000. Average price in that year was only 69 cents a bushel.

This year's total, however, is far below the bumper year of 1928, at least as far as production is concerned. During that time 566,726,000 bushels were harvested, but the average price was only 80 cents a bushel and this bumper crop was only valued at \$451,235,000.

Despite the bumper crop, not all was No. 1 wheat and not all will be useable for human consumption. A percentage, just how much is not yet known, will have to be classified as feed—because of its poor quality—and deducted from Canada's food supplies.

Added to this is the fact that the Dominion ended the 1945-46 crop year with a carryover of some 70,000,000 bushels, one of the lowest on record and the lowest point to which she could go without being in a dangerous position as to domestic supplies.

The 1946 crop, plus the carryover, brings the total wheat supply to approximately 490,000,000 bushels, but from this will have to be deducted 175,000,000 bushels for domestic consumption and another 85,000,000 as a safe margin for the 1946-47 carryover.

That will leave some 230,000,000 bushels available for outside customers. Britain will take 160,000,000 bushels, leaving possibly 70,000,000 bushels. Canada has four commitments totalling some 50,000,000 bushels so a bare 25,000,000 to 30,000,000 bushels will be left for shipment to other customers.

Oat production for all Canada this year was estimated at 400,000,000 bushels, barley at 159,900,000, rye 7,400,000 and flaxseed at 7,500,000.

Wheat production in Saskatchewan was estimated at 200,000,000 bushels. Alberta production was set at 137,000,000. Manitoba's production was 63,000,000 bushels.

This brought spring wheat production to 400,000,000 bushels compared with 294,600,000 in 1945.

Prairie production of oats was estimated at 276,000,000 bushels, barley at 145,000,000, rye at 5,915,000 and flaxseed at 7,285,000.

SPLENDID JOB DONE BY VETERAN SHIP

HALIFAX.—The big troopship Aquitania has brought the last major load of troops back to Canada and among them were veterans who had sailed from here with the first contingent of the 1st Canadian division in 1939.

At that time Gen. A. G. L. McNaughton, then a major-general with his eye on the possibilities of raising a full Canadian army, presented the Aquitania with the army's distinctive flag. She became the first troopship of the war to fly this flag from her masthead.

Maj.-Gen. Harry Foster, chief of the Atlantic command, presented the Aquitania with a bronze plaque as a tribute to a hazardous wartime job "well done". Gen. Foster recalled that the old trooper had carried more than 100,000 Canadians to war and back. The 33-year-old Aquitania won't wear her new honors for long. She is to make five more trips as a commercial transport and then be claimed by the breakers.

COULD NOT COMPETE

DENVER.—At last the word is out. The famed pony express was a financial flop. The colorful western business venture, founded in 1860, went broke after 16 months. The reason? The invention of the overland telegraph. The express, with its 500 horses and 200 riders, just couldn't keep up.

ALWAYS NEED HORSES

SASKATOON.—Provincial Agriculture Minister I. C. Nollert told the annual meeting of the Saskatchewan Horse Breeders' association that there would always be a job for the horse on certain farms where motor power was not economical.

TO REPLACE DONALD GORDON

K. W. Taylor will become head of the War-time Prices and Trade board within the next four months, succeeding Donald Gordon, who will probably return to his post-war job of deputy-governor of the Bank of Canada. Mr. Taylor has been with the board since the start of its operations.

Experts Predict Atomic Energy Within Decade

LAKE SUCCESS, N.Y. — United Nations economic experts on atomic energy said there is no chance that atomic energy will toss people out of jobs or be a threat to electrical power for at least 10 years.

These experts hold that it is improbable that atomic power can revolutionize the cost of power in the United States in this generation or displace coal as the primary power fuel.

As a result of their opinions, the UN economic and employment commission decided it would be premature now to assess the consequences of atomic power upon world economy and employment.

Dr. Isador Lubin, U.S. delegate on the commission, said America's final pilot plant aimed at the generation of electrical power from nuclear energy is not expected to be started until next year.

The final plant is intended, in its initial operations, to provide heat energy at conventional temperature levels ranging from 650 degrees Fahrenheit to 940 degrees Fahrenheit.

The scientific and technical committee of the UN atomic energy commission disclosed that in the opinion of some qualified observers the main technological difficulties involved in the economic generation of electrical power from atomic energy may be solved within the next 10 years.

But the experts are generally agreed that even if atomic energy is converted to peaceful purposes within 10 years there will be no immediate industrial revolution.

Lubin disclosed that a cost estimate made by Oak Ridge laboratories showed that it is much cheaper under present knowledge to operate a coal power plant because of the initial generating costs.

PRICE BOOSTS FOR MINERALS

OTTAWA.—Acknowledging "substantial increases" in production costs, together with reduced export quotas, the prices board announced large boosts in Canadian ceiling prices for copper, lead and zinc.

The revised ceiling for copper will be 61.625 cents a pound compared with 11.5 cents previously in force. Lead prices will jump from five to 10.63 cents a pound and zinc from 5.75 to 10.25 cents a pound for grade A electrolytic.

Prices for scrap material of these products will advance in proportion.

Simultaneously, the board announced the antimony prices will increase to 29½ cents a pound from 17½ cents, largely because of discontinued subsidies on this metal, most of which Canada must import.

Perambulating Pigeon

VANCOUVER.—Most Vancouverites have trouble with pigeons overhead—Mrs. Louise Hodgson, however, keeps tripping over 'em.

The name of her perambulating pigeon is Cheekie Girl, and although Cheekie is two years old, she hasn't learned to use her wings.

Cheekie Girl was found back in 1944, a trembling, month-old squab, whose mother apparently never told her that pigeons are meant to fly.

Cheekie Girl tried—just once. Her flight was short. She plummeted to the ground after rising about two feet. It was the little pigeon's first and last attempt to be like other birds.

Now, Cheekie Girl waddles about Mrs. Hodgson's kitchen and sleeps at night in a warm, cushioned box near the stove.

SOUTH AFRICA WILL NOT ACCEPT UN AGREEMENT

Smuts Declares German Territory To Continue Under Union's Laws

CAPE TOWN.—Prime Minister Smuts, of South Africa, told a tense, crowded house of assembly that South Africa would not submit the draft trusteeship agreement for Southwest Africa requested by the United Nations.

He declared the former German territory would continue to be administered under the union's laws—as it had been since a League of Nations mandate put it under South African administration in 1920.

The South African decision arises from strong Indian opposition in the UN general assembly last month to the South African application for incorporation of Southwest Africa in the union. An Indian resolution that the territory should be placed under international trusteeship committee by a 17-to-15 vote.

GORDON EXPLAINS NEW SHOE PRICES

OTTAWA.—New 11 and nine per cent. increases in men's and women's shoes respectively do not apply at the inventory level, Donald Gordon, prices board chairman, said.

"These increases will apply only to new stock coming in from the manufacturer," Mr. Gordon said.

Under the order the retailer will base his ceiling on the manufacturer's price, or on a basic period retail price, whichever is the lower. The board's order, announced recently, applies only to boots and shoes received from manufacturers after Jan. 20, when the order became effective.

BRITISH PEOPLE ARE BEING ASKED TO WORK HARDER

Government Says Position Of Country Serious

LONDON.—The government appealed to Britain's 20,000,000 working men and women—backbone of the government's support—to shoulder voluntarily the burden of industrial speedup as the only means of economic salvation.

Prime Minister Attlee's peacetime version of Winston Churchill's wartime call for "blood, toil, tears and sweat" was published as a white paper, on the eve of reopening of parliament.

"The position of Great Britain is extremely serious," said this document, addressed to employers as well as workers and issued with the admitted hope of becoming a "best seller" that will reach every executive office and assembly line in the country.

"The answer, first and last, is increased production," it said, after detailing three great dangers:

The threat of inflation on the home front, an export balance short of imports by £328,000,000 (\$1,312,000,000) in 1946, and a grave manpower shortage with no relief in sight "for some years to come."

HITLER'S SUCCESSOR TO DIE

FRANKFURT.—Sigfried Kahns, 23-year-old self-appointed successor to Adolf Hitler to perpetrate Nazism, was sentenced to death by hanging by a five-man military government court in Stuttgart.

COLD IN GERMANY

HAMBURG, Germany.—Thirty-two people froze to death and 124 were treated for frostbite in hospitals here between Jan. 1 and Jan. 17, according to official British figures released.

PUBLISHER'S MURDER BRINGS RESIGNATIONS—Entire cabinet of Peruvian President Jose Luis Riveo (above) resigned recently as a result of the allegedly political murder of one of Peru's most prominent publishers. Unidentified gunman shot down Francisco Grana Garland, publisher of the newspaper La Prensa.

CHURCHES ARE HOME FOR TWO MINISTERS

ARLINGTON, N.J.—Two pastors are about as close to their work here as one can get. They're living in their churches.

Unable to obtain other shelter because of the housing shortage, they have moved into apartments built in the churches in which they preach.

They are Rev. Frank Mierop and his wife and four-year-old son, living in the Oakwood Avenue Baptist church; and Rev. William Restrick and his wife and their infant daughter, living in the Church of the Nazarene.

Lord Louis Mountbatten is the great-grandson of Queen Victoria.

Retiring Secretary Of State Byrnes Makes Farewell

Farewell to members of the diplomatic corps is said by James F. Byrnes, centre, who left the office as U.S. secretary of state as Gen. George C. Marshall takes over in Washington. He shakes hands with Lord Inverchapel, left, and Henri Bonnet of France.

HON. PAUL MARTIN GODFATHER OF ONE OF CANADA'S FIRST CITIZENS—Father of Canada's citizenship bill, the Hon. Paul Martin, right, became godfather of Pauline Martin, daughter of Mr. and Mrs. Napoleon Martin of Chatham, Ont., born 12.05 a.m., New Year's Day. Baby is seen with her mother and Rev. O. A. Martin.

Exports Of Dairy Produce Blamed For Shortages

WINNIPEG.—The National Dairy Council of Canada was told by President Robert C. Smellie that Canadians were short of butter and other dairy products largely because of huge quantities of cheese and evaporated milk exported to the United Kingdom and not because farmers, or the industry, were unable to produce what was needed here.

"Declining milk production has reached the stage where it has become a national problem of the most pressing type," he said.

The export trade in dairy products he described as important to Canada's economy, but said that it would be most difficult to continue exports on any large scale in the face of a decreasing over-all milk supply and the ever increasing demands of Canadians for dairy products.

There was also the question of how long Canadians would continue to accept a six ounce butter ration and restrictions on usage of other dairy products.

Whipping cream substitutes were now on the market, frozen dessert preparations were taking the place of ice cream to a large extent and the use of butter was greatly curtailed.

"It would appear reasonable to assume that if present restrictions and controls are continued to the point where there is a decline in consumer purchasing power we may eventually have a great deal of difficulty in building up consumption to the levels which would have prevailed if it had not become necessary to impose such restrictions."

The decline in milk production was a matter of national concern to every Canadian, Mr. Smellie said. It had reached the point where a choice had to be made as to whether the industry was to be a purely domestic one or continue in the export field.

"If the latter, Canada must find ways and means of encouraging farmers to produce more milk."

Gen. Marshall Not Interested In Politics

WASHINGTON.—Gen. George C. Marshall took office as secretary of state after bluntly squelching speculation that he might be available later as a Democratic candidate for president.

Some Democrats had discussed the idea of drafting him if President Truman should not run in 1948.

Before taking his new post, Marshall in an unsolicited statement to reporters declared:

"I cannot be drafted for any political office."

In addition to squelching presidential speculation concerning him, Marshall also said that he considered the secretaryship of state to be a non-political job.

"And," he said, "I am going to govern myself accordingly."

Marshall's statement was perhaps the most explicit and unambiguous disavowal of political ambition since another general took himself out of politics after the civil war. At that time Gen. William T. Sherman declared that he would not run for president if nominated and would not serve if elected.

"I am being explicit and emphatic," Marshall said, "in order to terminate once and for all any discussion of my name in regard to political office."

Whatever his feelings about political office, the moment Marshall took oath as secretary of state he became heir to the office of president should anything happen to Mr. Truman in the next two years.

There being no vice president, the secretary of state is now first in the line of succession.

Marshall took the oath of office as successor to James F. Byrnes from Chief Justice Fred M. Vinson in Mr. Truman's executive office. Present at the ceremony in addition to Mr. Truman were Byrnes, the cabinet, high government and congressional officers, and friends of the general.

The former army chief of staff arrived here by train from Chicago completing a journey from China which was interrupted by several days of rest in Honolulu and by a brief layover at Chicago where his plane was grounded by bad weather.

REACHED HIGH ALTITUDE

LONDON.—A jet fighter plane reached an altitude of 51,200 feet in a routine experimental flight near Salisbury in what was believed to be a record altitude for jet planes. The plane was a Vampire fighter powered with a Rolls-Royce engine, and was piloted by Wing Commander John Baldwin.

Recent tests show that palladium has a tarnish resistance equal to platinum, its sister metal.

"MY WEEK" continued from inside page

Then the people began to speak in unanimous tones and the papers started to write about it, the Government back-tracked in a little less than a jiffy and it was all over, it became \$1.00, a much more reasonable arrangement.

But here's the rub, that couldn't happen in Russia. In a totalitarian state the government never does wrong, it is dangerous even to say that it might do wrong, a flippant remark like that might send one to the salt mines for life. It is nice to live in a country where the people may speak to the government and the government listens to what they say. It is highly important that it

should and a good way to keep in power, if it only realizes that fact.

Henry Ford stirred up something the other day when he reduced the price of his cars by \$50. This action is vitally important. Conditions are improving. They may not go on improving if we are prevented from buying the products we produce. There are two ways of increasing purchasing power. We may raise wages or we may lower prices, which should we do?

There is a wide difference of opinion on this point among leading economists. Some think that increased wages alone will do the trick. A reduction in prices is obviously equivalent to an increase in wage rates. It lowers the cost of living, makes the dollar buy more. It extends its benefits not alone to those working on salaries and wages, but to those engaged in agriculture and to the thousands of others who are working for themselves, those who are paid out of commissions or out of the profits of their business.

Further it helps those receiving pensions or living on old age annuities, which are not generally very large. It increases the real value of family allowances. Now that we have so many payments of this kind to make it is well to remember that if the cost of living goes up, it will take something from those to whom we have previously made a contribution. We shall certainly be asked to vote more money to help those we have already helped. In that case taxes will go up.

It is highly important in a movement towards better conditions that we should keep our eye on the main objective. We should see to it that the gains which arise from the improvement in production should go towards a reduction in the cost of living. Only in that way can we have full employment for all sections of the community. It means, not necessarily higher wages but certainly fuller employment, higher total earnings for labor, more employment for all.

LOST—Wallet, containing money and Identification papers etc. Reward. Return to The Recorder or Dick Chipman, Welling.
